Transfer

Modules

Submission

- 
- How to ssh
 - SSH-Keys
 - Login & Compute nodes

Login & Compute Nodes

Ssh-keys

Generate the ssh-key

Private: id_ed25519

Public: id_ed25519.pub

\$USER_PROFILE/.ssh/id_ed25519

\$HOME/.ssh/authorized_keys

Ssh-keys

Match

*wrong
private*

*wrong
public*

Roadmap

Connection

Accounts

Transfer

Modules

Submission

- 
- Ground rules
 - Home folders
 - Useful commands

User and project account

User Account

- Unique: username
- Same across all ICHEC services
- Required to access key
- `/ichec/home/users/courseXX`
- Storage: 25GB

Project Account

- ID name **course**
- PI manage the account
- Required to access key

You need an user account + project to connect to key

Multiple users can share a **project** account

Multiple **projects** can be assigned to a user account

Sharing users accounts is strictly forbidden

User and project account

Register an account: <https://register.ichec.ie>

Condominium Access

Projects

Class C (1 year) : **small** resources:100k CPUh/250GB

Class B (1.5 year) : **medium** resources:1M CPUh/1TB

Class A (2 years) : **large** resources:10M CPUh/5TB

Useful commands

- **quota**

```
[course00@login1 ~]$ quota
Disk quotas for user course00 (/ichec/home/users/course00):
    Used: 0.00 GB    Soft: 25.00 GB    Hard: 27.50 GB
[course00@login1 ~]$
```

- **mybalance**

```
[course00@login3 ~]$ mybalance
=====
Core Hours Allocation Information for account : course
=====
Allocated Core Hours      :      833333.33
Project Consumed   Core Hours :      160791.67
Percentage of Project Consumed :          19.30
=====
[course00@login3 ~]$
```

Roadmap

Connection

Accounts

Transfer

Modules

Submission

- Transfer files
- Scp clients

Transferring files

Transferring files:

- Putting files from your laptop to Kay

```
scp SOURCE username@kay.ichec.ie:DESTINATION
```

```
goar@815-goar:~$ scp myfiles goar@kay.ichec.ie:/ichec/staff/goar
```

Transferring files

Transferring files:

- Bringing files from Kay to your laptop

```
scp goar@kay.ichec.ie:SOURCE DESTINATION
```

```
goar@815-goar:~$ scp goar@kay.ichec.ie:/ichec/staff/goar/myfiles .
```

SCP/SFTP Clients

Windows

- **Mobaxterm**
- Filezilla
- Bitvise
- WinSCP
- Cyberduck
- Git bash

<https://mobaxterm.mobatek.net/>

Mac OS

- **Cyberduck**

<https://cyberduck.io/download/>

Linux

- **Filezilla**

<https://filezilla-project.org/>

Roadmap

Connection

Accounts

Transfer

Modules

Submission

- 
- Modules
 - Load, list, delete

Modules

Modules allow access to certain software, compilers, etc. in Kay
Prevent mismatch or interference with other libraries
Allow using different versions of a program/compiler/etc.
Access to python and conda environments

module load

Modules

Syntax: `module [command] arguments`

module: shows all options

module av/avail: shows modules available in the system

module load *name*: loads *name*

module unload *name* : unloads *name*

module list: lists all modules currently loaded

module purge: unload all modules

Roadmap today

Connection

Accounts

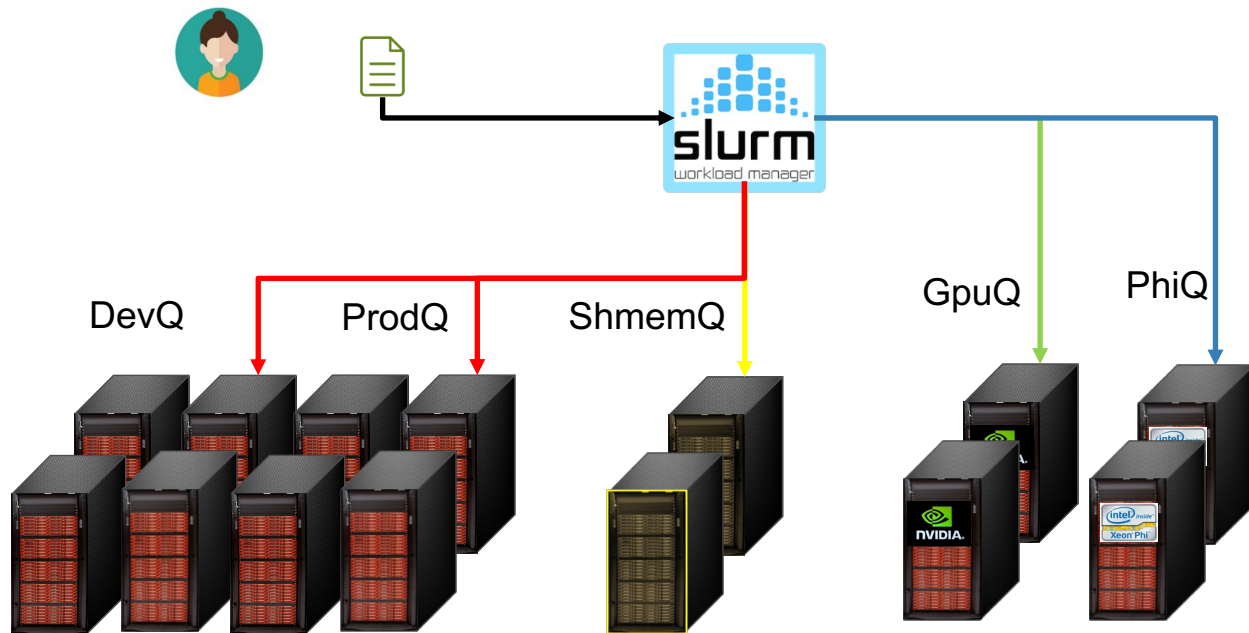

Transfer

Modules

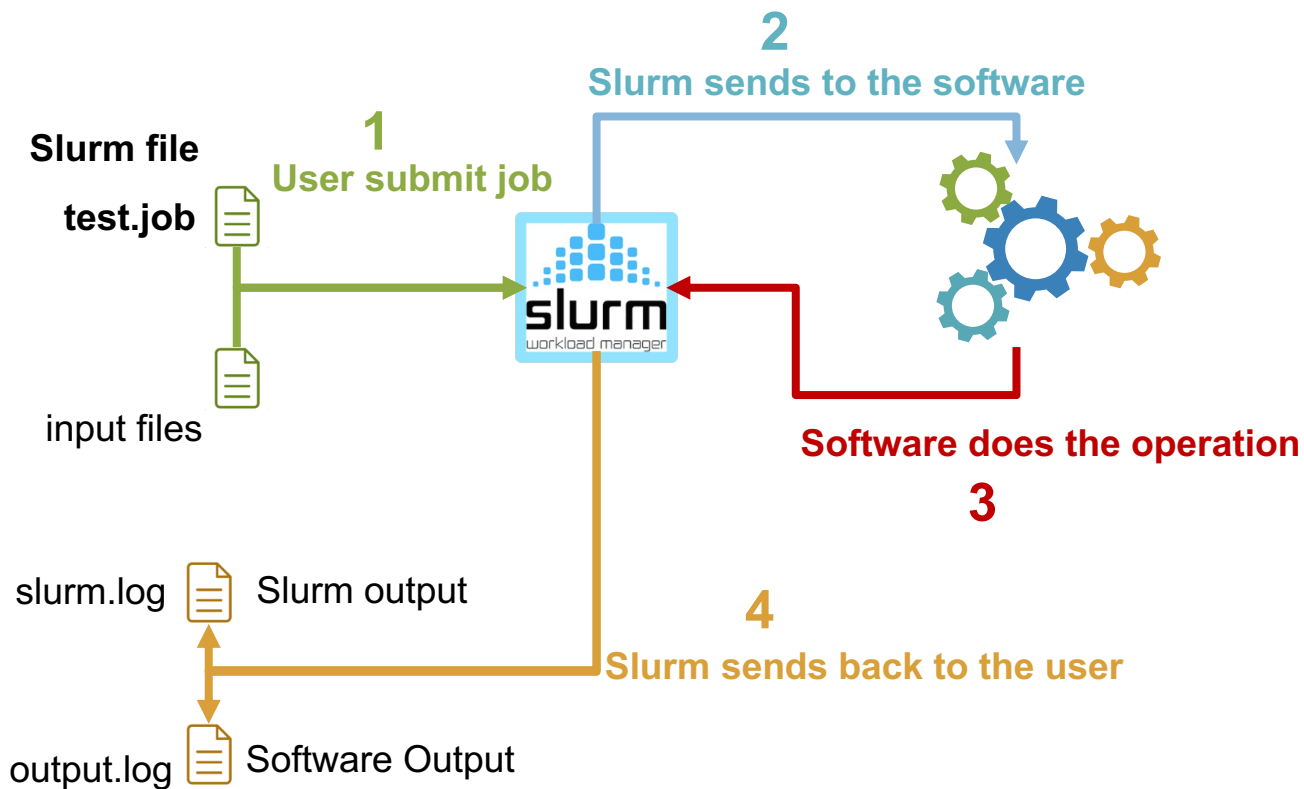

Submission

- 
- Queues
 - Submission Script
 - Jobs control

Slurm Manager

Workflow

Workflow

Slurm file

test.job

Slurm submission file

```
#!/bin/bash

#Slurm flags
#SBATCH --partition=CourseDevQ
#SBATCH --reservation=CourseMar2
#SBATCH --nodes=1
#SBATCH --time=00:30:00
#SBATCH --job-name=test
#SBATCH --account=course
#SBATCH --output=slurm.log
#SBATCH --mail-user=myemailaddress@universityname.ie
#SBATCH --mail-type=BEGIN,END

cd $SLURM_SUBMIT_DIR

#Load module

module load XXXXX

#do something
```

Slurm file

Slurm file

test.job

```
#!/bin/bash

#Slurm flags
#SBATCH --partition=CourseDevQ
#SBATCH --reservation=CourseMar2
#SBATCH --nodes=1
#SBATCH --time=00:30:00
#SBATCH --job-name=myjob
#SBATCH --account=course
#SBATCH --output=slurm.log
#SBATCH --mail-user=goar.sanchez@ichec.ie
#SBATCH --mail-type=BEGIN,END

cd $SLURM_SUBMIT_DIR

#Load compiler's module

module load gcc/8.2.0

#compile the program
g++ -o helloworld.o hello_world.cpp
```

Slurm file

Slurm file

 test.job

```
goar@login1:~$ sbatch test.job
```

Hints:

- You need 1 slurm file per job
- You need all the necessary input files

Submission

Slurm Manager

Description	Command
Queue Status	sinfo
Submit Job	sbatch job.sh
Check Job Status	squeue -u \$USER
Cancel Job	scancel 123213
Check Project Account Balance	mybalance
